

STATEWIDE ONBASE 9.2 UPDATE

Technical Advisory Council

December 3, 2010

Stewart Bruner

Background

- AJACS 3.4.1 capable of full OnBase integration
- Deployed mid-year with feature inactive
- OnBase 9.2.1.138 plus Unity Integration Toolkit prerequisite on all standalone EDMs
- Kickoff call held July 29, 2010, to discuss with all GJ courts
- Follow-up calls held each Monday since then with individual courts, AOC team, and OSAM

Objective

- ❑ Get all GJ standalone systems to minimum versions of core and clients that enable integration and document transfer function
- ❑ Synch security keywords in CMS and EDMS
- ❑ Only upgrade production one time!
- ❑ Enable testing for clerks to experience minute entry finalization/keyword mapping prior to go-live
- ❑ Coordinate upgrade dates to ensure OSAM can install/support statewide

Experience

- ❑ Peeling the onion has revealed...
 - ❑ Maintenance not current everywhere
 - ❑ County systems require added internal coordination
 - ❑ VMs for testing require AOC coordination
 - ❑ Web Services Toolkit to Unity license changeover requires OSAM coordination
 - ❑ Security keyword strategies are all over the map
 - ❑ Platter management error affects CDR
 - ❑ OB V10 “solves all problems” but never tested w/ AJACS
- ❑ Can't get a production upgrade date anywhere

Actions

- Agree on security keyword mapping scheme
- Unity 30-day evaluation copy and switchover plan
- Keyword updater license key change
- Sweep program to address historical docs
- Local efforts to bridge county network to AJIN and install icons redirecting scanner to VM

Actions

- ❑ Connect VMs to county prod supt databases
- ❑ Confirm thick clients exist in counties requesting push from AOC
- ❑ Confirm platter mgt error addressed by new build
- ❑ Communicate exact builds to be installed
- ❑ Confirm sweep program functions correctly

Big Action

- Get commitments to upgrade on specific dates
 - ▣ Continue to fly plane while working on engines!
 - ▣ AJACS 3.5x upgrade has no impact
 - ▣ Pick a date before AJACS picks one
